

## Pure Tone® Product Installation Instructions

<b>Product Code</b>	UH13	<b>Product Name</b>	5 Way Selector Switch
<b>Instruction Release</b>	1.1	<b>Release Date</b>	May 2009
<b>Required Items</b>	Soldering iron, hand tools, shielded cable (if new install).		
<b>Recommended Items</b>	Multimeter.		

**Please note:** Pure Tone strongly recommends you have this pick up professionally installed by a qualified luthier.

The design of this shielded switch is quite simple and presents 5 output options.

1. If installing to replace an existing switch, these instructions detail a 'standard' configuration for a Strat® style guitar.
2. Please refer to the below diagram.
3. Connection 'D' on as shown on the switch is the output connection to the guitar pots, output jack etc as particular to the guitar. (Note: there are too many control variations to detail them all here. Please email us if you have require any specific information.)

### PUP Selector Positions

1	2	3	4	5
Neck	Middle	Bridge	Neck + Middle	Bridge + Middle
